Pallet ID Transfer Location

PalletID/Code *

GTIN	PALLET CODE
4549873068183	6287023288880102349
GRID - Display GTIN ; PalletCode - ItemCode - ItemSerialNumber , BinLocation ALL Items under the PalletID Scanned will all be displayed here	

Bin Locations TO *
Totals*

- GRIDS – To show GTIN – PalletID – ItemCode – ItemDesc – BinLocation
- All Items which belongs to the same PalletID will be shown here, there could be 1 or more items loaded in the GRID.
- Scan again button – goes back to previous screen, to accept again another Item Serial.
- Transfer Location button

- Bin Location must be selected / no null / empty during the transfer process –
Select/Enter a Bin Location from the DROPDOWN / or Search Bar in the device.
- Update automatically the BinLocation from tblMappedBarcodes using the new location
selected for all the items in the grids.
- SAVE the Bin Location last entered ... since they are transferring many pallets in the
same locations, and when they change it, it will refer to the updated location.
- Once Transfer process is done ... display simple message “Pallet ID transfer into a new location”,
then goes back to previous screen, accepting another Item Serial.

-
